

SAMEER GHIMIRE

E: smr.ghimire@gmail.com | M: +91 9869 292648 | A: Dhapakhel, Lalitpur, Nepal - 44700

PROFESSIONAL SUMMARY

AI and Platform Engineer with 10+ years of experience building AI-enabled products, developing data-driven applications, evaluating and improving large language models, and leading cross-functional technical projects. Experienced across Python, JavaScript, Node.js, SQL, REST APIs, AI model evaluation, multimodal systems, inference testing, automation, and product development. Strong background in AI-assisted software development, debugging production systems, designing evaluation frameworks, and taking products from concept through deployment. Passionate about rapidly learning new technologies and building scalable AI products.

KEY SKILLS

Programming: Python, JavaScript (ES6+), TypeScript (Working Knowledge), SQL, Node.js, React, HTML/CSS

AI Engineering: LLM Evaluation, RLHF, Multimodal AI, Prompt Engineering, Model Evaluation, Reasoning Validation, Benchmark Creation, Agentic AI, AI-assisted Development, Inference Testing, UAT, Dataset Curation

Platform Engineering: REST APIs, JSON, Browser DevTools, Log Analysis, Debugging, Postman, JIRA, Notion, Confluence, Git, Linux (basic), Cloud Platforms (working knowledge)

Databases: SQL, PostgreSQL (working knowledge), Google Sheets, Excel

Product Development: Requirement Analysis, Rapid Prototyping, Workflow Design, Stakeholder Management, Technical Documentation, Process Automation

Languages: English (C1), Hindi (Native), Nepali (Native)

WORK EXPERIENCE

Leadership

Prevent Cancer Nepal (PRECAN)

Director of IT & Innovation (07/2026 - Present)

- Lead the organization's digital transformation strategy by aligning technology, AI, and innovation initiatives with organizational goals.
- Direct the development of secure, scalable digital platforms, overseeing software development, IT infrastructure, and technology governance.
- Collaborate with healthcare professionals, government agencies, and strategic partners to deliver solutions that improve operational efficiency and public health outcomes.

Engineering and Data Operations

Avocado Technology (Consulting)

Senior AI & Platform Engineer | Project Manager (07/2017 - Present)

- Support software, AI, and platform engineering projects from planning through delivery.
- Develop Python- and SQL-based data validation, reporting, and workflow automations.
- Analyse datasets including logs, JSON, and system outputs.
- Build dashboards and operational reports to communicate KPIs and engineering insights.
- Collaborate with developers on software architecture, integrations, and production.

Trilogy (via Crossover), Texas, US (Remote, Contract)

Technical Support Specialist (06/2020 - 01/2023)

- Resolved production software issues using browser developer tools, REST APIs, and log analysis.
- Investigated application defects and collaborated with engineering teams on permanent fixes.
- Managed end-to-end troubleshooting and incident resolution.

- Conducted remote technical support sessions and documented recurring technical issues.

KTM Techies Pvt. Ltd., Kathmandu, Nepal
Senior Project Manager (08/2018 – 06/2020)

- Managed software implementation projects across multiple clients.
- Coordinated Agile teams, timelines, onboarding, and stakeholder communication.
- Designed workflow documentation and performance monitoring systems.
- Managed project planning using JIRA, Notion, and Confluence.

EXL Service Pvt. Ltd., Gurugram, India
Business Analyst (01/2016 – 07/2018)

- Analysed business requirements for commercial banking and risk strategy projects.
- Worked extensively with SQL and SAS for data extraction and reporting.
- Supported operational risk mitigation initiatives.
- Collaborated with stakeholders to deliver data-driven business solutions.

AI Data Training & Model Evaluation
Mercor, California, US (Remote, Contract)
Generalist AI Expert (06/2026 – Present)

- Designed complex multimodal queries combining challenging visual inputs with detailed reasoning tasks to evaluate frontier AI models.
- Assessed and scored responses from multiple AI models using structured evaluation rubrics, benchmarking reasoning quality, factual accuracy, and instruction following.

Domain Expert – Computer Science, Technology & Engineering (04/2026 – Present)

- Design complex multimodal evaluation tasks using challenging image-based prompts requiring advanced technical reasoning.
- Evaluate and benchmark frontier AI models for factual accuracy, logical reasoning, and instruction adherence.

Sports Analytics Expert (03/2026 – Present)

- Design sports reasoning benchmarks involving statistical analysis and historical data.
- Perform adversarial testing to identify reasoning failures in AI models.
- Develop benchmark solutions with validated calculations.

Micro1, California, US (Remote, Contract)
AI Trainer (06/2026 – Present)

- Train and evaluate AI models through high-quality data creation, annotation, validation.
- Perform RLHF-based evaluations across reasoning, coding, and multimodal tasks.
- Identify model failure modes and provide structured feedback to improve performance.

AfterQuery, Remote (Contract)
AI Expert (06/2026 – Present)

- Create benchmark datasets and technical reasoning tasks for frontier AI systems.
- Evaluate AI-generated responses across programming, mathematics, and logical reasoning.
- Develop structured rubrics to ensure consistent model evaluation quality.

Pareto Inc., California, US (Remote, Contract)
AI Expert (12/2025 – Present)

- Curate structured datasets, including JSON, for Agentic AI systems.
- Contribute to deep search and reasoning evaluation workflows.
- Design rubrics and evaluation frameworks for consistent model assessment.

xAI, California, US (Remote, Full Time)
AI Tutor (01/2025 – 11/2025)

- Performed multimodal AI evaluation across text, image, audio, video, search, a

nd reasoning.

- Supported model alignment through high-quality STEM and non-STEM evaluations.
- Conducted UAT testing across Grok web and mobile deployments.
- Mentored contributors through QA reviews and feedback sessions.
- Assisted workflow optimisation and guideline refinement.
- Supported L1/L2 review processes, edge-case documentation, and quality monitoring.

Invisible Technologies, California, US (Remote, Contract)
Quality Analyst – Advanced AI Data Trainer (07/2024 – 01/2025)

- Led QA reviews across AI annotation workflows.
- Conducted contributor quality assessments and coaching.
- Coordinated onboarding and process improvements.
- Managed documentation using Notion and Whimsical.

Advanced AI Data Trainer (01/2023 – 07/2024)

- Evaluated AI-generated responses for reasoning, factual accuracy, and usefulness.
- Created benchmark responses and detailed evaluation feedback.
- Improved prompt quality and conversational performance.

Sports Experience

Nepal DodgeBall Federation, Kathmandu, Nepal
National Committee Member (11/2025 – Present)

- Serve as a permanent central committee member supporting national-level planning and organizational activities for dodgeball development.
- Represent the organization at district and local levels to facilitate team formation and grassroots expansion.
- Coordinate with local stakeholders to structure district teams and align them with national guidelines.

Cosmic International Academy, Kathmandu, Nepal

Head of Sports Performance and Analytics (06/2019 – Present)

- Led structured sports programs focused on student fitness, skill development, and performance improvement.
- Tracked and analyzed basic performance metrics to monitor progress and inform training adjustments.
- Organized sports events and evaluations, reporting participation and performance outcomes to school leadership.

Academics & Teaching

Patan Multiple Campus, Lalitpur, Nepal (Part-Time)

MIS Lecturer | BBA 3rd Semester (12/2019 – 06/2020)

- Conducted Management Information Systems lectures and seminars.
- Developed applied learning materials and student case studies.

The British College, Kathmandu, Nepal (Part-Time)

Computer Science Lecturer | A Levels (11/2019 – 07/2020)

- Taught A-Level Computer Science based on UK curriculum standards.
- Supported students during the transition to remote learning during COVID disruptions.

GEMS Institute of Higher Education, Lalitpur, Nepal (Part-Time)

Computer Science Lecturer | Higher Secondary (08/2018 – 05/2019)

- Delivered NEB Computer Science lectures and academic support.
- Supported student development through tutorials and pastoral guidance.
- Prepared lesson plans, assessments, and examination materials.

Entrepreneurial & Business Experience

Shan Vehicle Rental, Kathmandu, Nepal

Co-Founder | Operations Lead (08/2023 – Present)

- Manage end-to-end operations of a vehicle rental business, including bookings, pricing, and customer coordination.

- Design marketing creatives, promotional posts, and video content for digital platforms.
- Use tools such as Photoshop, Canva, and video editing software to create brand assets.
- Oversee website presentation, visual consistency, and customer-facing design elements.

Burger House & Crunchy Fried Chicken, Kathmandu, Nepal

Co-Founder | Operations Head (07/2019 - 12/2020)

- Managed restaurant operations, vendor coordination, and process standardization.
- Business operations were discontinued due to the COVID-19 impact.

Mejor Lounge, Kathmandu, Nepal

Co-Founder | Operations Head (06/2019 - 04/2021)

- Managed hospitality operations, staffing, inventory, and customer engagement.
- Business operations closed due to the COVID-19 impact.

EDUCATION

Visvesvaraya Technological University, Karnataka, India - 07/2015

Bachelor of Engineering: Computer Science
